Summary:

The System ROM has been revised to change the Zoom function. Any Zoom ratio will now start from the 100% setting. In the previous ROM version it was possible to use the enlargement and reduction step keys to come close to the custom Zoom setting and then use the Zoom key. In the new version of ROM, in order to zoom to a custom setting, the step keys cannot be used. Once the Zoom key is pressed, the ratio will begin at 100%.

Example:

Previous ROM
